Flushing oriented feeding	300

### BENEFITS OF OLIVE PULP

- It is a natural product.
- It is digestive and gives feeling of fullness.
- Increases water consumption and feed conversion.
- Increases the oil amount, quality and production of milk.
- Accelerates growth and increases feed performance.
- Provides coat brightness.
- Helps prevent seborrhea.
- Increases the number of progeny.

Store in a dry, cool and ventilated place.

- It is recommended not to feed non-milking bovines with more than 500 grams.
